Chan do Monte 2006-2008
Professional school of technical studies

- Object Oriented Programming (Java)
- Android development.
- Relational databases (MySQL)

LANGUAGES

Spanish 
English 
Portuguese 

PROFILE

Friendly, curious programmer always willing to learn new technologies and automate things. I feel at home doing backend development but I am not hesitant to work in different stacks.

I am currently working remotely from Pontevedra, Spain but would be willing to adjust to other timezones.

WORK EXPERIENCE

Full Stack Developer (Remote)

dxa Valantic (former DGTLS) (3 years) 03/2023 - Present

- Plan, implement and maintain custom features for Pimcore.
- Improve highly available asynchronous importing/exporting processes for large amounts of data for international clients.
- Improve performance and functionality of internal Symfony bundles.
- Maintain UIs (storybook, react)
- Support/teach junior devs

Full Stack Developer (Remote)

Rentview (6+ years) 09/2016 - 03/2023

- Maintain staging, production and database cloud servers in good health.
- Build and maintain new marketing software in Laravel.
- Build automated asynchronous matching system for agencies and renters.
- Build and update Rentview renter profile mobile application (Android and iOS).
- Build REST API for the mobile applications.
- Build Rentview Video mobile application (iOS, Android).

Backend Developer (Remote)

Simplify (now rebranded to Bonflite) (1 year) 08/2015 - 08/2016

- Build and maintain the backend and internal dashboard.
- Build a database of products of duty free shops worldwide.
- Scrape duty free product prices from different airport websites.
- REST API for the mobile applications.

Junior Developer (Dublin, Ireland)

Rentview (2+ years) 04/2013 - 08/2015

- Maintain and improve the managing software for rental agencies (Zend, Symfony).
- Consume and keep up to date software external API's (Calendar, Geolocation, OAuth, Maps, Stripe, etc)
- Implement full fledged kanban board with Google Calendar synchronization.
